

Privacy Policy - Sazia

Last updated: October 2025

This Privacy Policy (hereinafter, “the Policy”) describes how the Sazia application (hereinafter, “the App”) collects, uses, and protects user information. By using the App, you agree to the practices described in this Policy.

1. Data Controller

Controller: Jaime Vila Orquín (individual developer)

Country: Spain

Contact email: sazia.jvo@gmail.com

The Sazia App is owned and operated by the developer identified above.

2. Information We Collect

Sazia only collects the minimum data necessary for its proper operation:

- Username (which can be freely chosen by the user)
- Food allergies and intolerances
- Recipe preferences and personal settings
- Basic technical data (such as language or theme) stored locally on the device.

Sazia does not request or store email addresses, phone numbers, or financial information.

3. Use of Information

Collected information is used exclusively to:

- Generate personalized recipes based on user prompts and allergy preferences.
- Improve the user experience within the App.
- Allow the user to save or delete recipes.

Data is not shared with third parties, except with the artificial intelligence provider (OpenAI), which acts as a data processor to handle prompts in an anonymized way.

4. Data Retention and Deletion

Personal data is stored for as long as the user keeps using the App. Users can delete all their data directly from the App at any time. Prompts sent to the AI are deleted once the recipe has been generated and are not stored on servers.

5. Data Security

Sazia uses encrypted connections (HTTPS) and relies on MongoDB Atlas, which applies industry-standard security measures to protect information against unauthorized access or accidental loss.

6. Camera usage

Sazia requests access to the device camera (android.permission.CAMERA) only to allow the user to take pictures inside the App, for example to register food, ingredients or other content related to normal use of the App. Images captured are used exclusively for this functionality and are not shared with third parties for commercial purposes. The user may disable this permission from the device settings, although some features of the App may become unavailable.

7. Subscriptions and payments

Sazia uses the subscription and payment systems provided by Google Play and the Apple App Store. The App does not directly access or store the user's banking or card details. All payment information is processed securely by the respective distribution platforms, according to their own privacy and security policies.

8. User Rights

Users may request information, correction, or deletion of their data by contacting sazia.jvo@gmail.com. They may exercise the rights recognized by applicable data protection laws at any time.

9. International Data Transfers

The App may use third-party services located outside the European Economic Area, such as OpenAI, which ensures an adequate level of protection through recognized mechanisms (such as Standard Contractual Clauses).

10. Underage Users

Sazia is intended for users aged 16 and older. If you are under 16, you must obtain parental or guardian consent before using the App.

11. Policy Updates

Sazia may update this Privacy Policy at any time. Any modifications will be notified within the App or on the official website. The latest update date will be indicated at the beginning of this document.

12. Access to the Policy

This Policy will be available within the App and on the official Sazia website (pending link: <https://sazia.app/privacy>).
